## GiveWP – Donation Plugin and Fundraising Platform

By GiveWP

It is sometimes difficult to pick favorites, but in the world of WordPress donation plugins, this is not at all the case. The GiveWP Donation plugin is far ahead of the rest in terms of price, beauty, functionality, and add-ons. The plugin makes money on the freemium model, but none of the add-ons is forced upon you. In fact, most nonprofits and charities will be fine using the default donation form without any add-ons. Forms are better than most of the other plugins on the list and don't need much customization.

The free WordPress donation plugin includes user-friendly donation forms, full-featured reporting, full donor management, and the ability to integrate with any of your favorite themes or page builders. As I said earlier, most organizations don't need this anymore. However, you can consider one of the add-on packages (from \$ 15 per month) or pay for add-ons individually.

want” so that you can support the plugin or get it for free. If you look at the premium membership here, you will notice that it starts at \$99 per year and rises to \$249 per year. It’s a decent plan considering you get access to newsletter integrations, freebies, Easy Digital Downloads support, and paid gateways.

The most expensive version (the \$249 per year plan) offers some of the following features:

- Recurring donations
- Peer to peer fundraising
- Crowdfunding platforms
- Automatic crowdfunding payments
- Everything you would get from the lower-priced plans

So, Charitable definitely stands out for some of its unique features. We especially love the videos and geolocation tools that the free version has. It’s also nice to see support for anonymous donations, as not everyone likes to have their name posted all over the Internet after donating.

Interesting features of the plugin:

- Solicit donations based on location.

PayPal Donations plugin may not sound like what you are looking for, but you will be surprised how elegant and powerful this little gem is. In fact, it makes perfect sense that PayPal knows how to donate as the company has been collecting payments for some time. I recommend PayPal donations to anyone who loves the simplicity of PayPal products. Everything from PayPal can be used by newbies and have no problem growing your organization. Be aware that this WordPress donation plugin was not actually created by PayPal. It uses a payment gateway, but you shouldn't expect customer support from PayPal. However, PayPal Donations adds a donation shortcode to your WordPress dashboard. This way you can embed the shortcode on any page or activate the widget in the sidebar or footer. That's all. You must of course link your PayPal account, but it only takes a minute.
